ERM dataset: variables dictionary

N.B. EU and WORLD cases contain info which is often already included in the country cases (where available). These cases are excluded from any EU wide analysis of the ERM data by Eurofound researchers – to avoid double counting of cases. Fields marked * are non-mandatory.

A full description of the dataset, including methodology and bias, is available in the ERM report available at this link. See also the methodology for up-to-date information on the network of European correspondents submitting the ERM cases.

1. **Case ID:** unique case identifier, (useful because if you filter by company name you might think you have duplicates - the same company can appear in multiple cases and in various years)
2. **Creation Timestamp:** timestamp of when this case was first created
3. **Title:** name of the company or of the establishment
4. **Sector:** sector where the restructuring/expansion is taking place at three different levels
5. **NACE code:** NACE rev. 2.1 code (sector) (see more at NACE codes)
6. **Number employed:** number employed by the establishment or group of establishments undergoing restructuring
7. **Company group:** name of the group to which the establishment/company belongs *
8. **Country:** country where the restructuring/expansion is taking place
9. **Nuts:** name of the region(s), three different levels based on the NUTS 2024 classification including the digit and the code (see more at NUTS code)
10. **Location of affected units:** if available, location of the affected establishment(s) *
11. **Announcement date:** date on which the restructuring announcement was made by the company if not available when it first appeared in the media
12. **Min planned job reductions:** number of announced job losses, adjusted if further information is made available at a later time. This is the minimum indicated job loss field, it is mandatory (in cases of job losses) and is the reference field for job losses
13. **Max planned reductions:** if available, maximum number of announced job losses *
14. **Planned job creation:** number of announced job gains (mandatory in cases of 'Business expansion')
15. **Type of restructuring:** only one type per factsheet is selected from the following categories - Relocation, Outsourcing, Offshoring/delocalisation, Bankruptcy, Closure, Merger/Acquisition, Internalrestructuring, Business Expansion, Reshoring
16. **Employment effect start:** date in which the employment effect is foreseeably going to start *
17. **Foreseen end date:** date in which the employment effect is foreseeably going to end *
18. **Direct dismissals:** job losses due to dismissals (already included in job loss count) *
19. **Other job reduction measures:** other types of job losses i.e. early retirement (already included in job loss count) *
20. **New location**: in case of offshoring, country(ies) to which jobs are offshored. If applicable, the different offshoring locations will appear in separate columns.
21. **Description:** free text field, short narrative of the case (100-300 words in general)
22. **Sources:** field with list of media source(s), date and link of source article provided at time of submission (older links may no longer be valid). Different components are separated by semicolon

Important Information - Updated November 2025

Reminder: ERM restructuring events database is made available to interested researchers upon request for non-commercial research purposes only, subject to the following conditions:

1. Quote the source of the data should you use it in your study. If possible, please use this citation style:
   Eurofound, European Restructuring Monitor (ERM), available at: https://apps.eurofound.europa.eu/restructuring-events

2. We would appreciate if, once published, you could send us a pdf copy of your study or a link to it. Eurofound is always interested to read about other researchers' findings on the ERM dataset.
